# FOURTH INTERNATIONAL ENVIRONMENTAL FORUM GREEN ENVIRONMENT & SUSTAINABLE DEVELOPMENT

## المنتدى البيئي الدولي الرابع " البيئة الخضراء والتنمية المستدامة "

### SCOPE

Tanta University organizes the International Environmental Forum as one of the university's scientific platforms for communicating researchers, companies, organizations and the local and international communities. The first forum discussed the environmental awareness and community work dissemination culture. The second forum devoted to investigating the risks and negative impacts on the environment and the prospects of the sustainable development. The third forum came to shed light on the environmental pollution, its problems and solutions.

The fourth forum discusses the world's overarching theme of the green energy and sustainable development focusing on the environmental investment, raising awareness about natural protection and spot on the implementation of development policies, integrating the environmental dimension and balance between the priorities of economic growth and environmental dimension. The Forum adopts a sustainable development strategy - Egypt 2030 and discusses the three dimensions of the sustainable development (economic, social, and environmental).

In TUEF2020, environmental issues will be discussed in a number of 15 topics, all of which aim to conserve the environment and manage it with sound scientific foundations to better understand the current environmental risks and propose the most suitable methods by proposing ameliorative and preventive measures of the impacts as well as the review of the concepts of contemporary economic and legislative challenges to ensure a clean and sustainable green environment.
